

Super-Journal Week 3:1

Every night, you should be reading at least 30 minutes of whatever book you have checked out from your assigned reading list. Tape or glue (but do not staple) this sheet into your Super-Journal on the left-side page. Fill in the table below *every day* by recording the required data.

Day	Title	Start Pg.	End Pg.	Parent Sign.
Monday				
Tuesday				
Wednesday				
Thursday				
Friday				
Saturday				
Sunday				

On the right-side page of your Super-Journal, answer one of the questions below throughout the week. Be sure that the questions you choose to answer go with the appropriate type of book (Fiction or Nonfiction).

FICTION

1. You will be making 2 whole page colorful illustrations based off of 2 separate quotes from your reading. Each illustration should take an entire page and should be colored. Make sure that you write the quote, and the page number you got your quote from at the bottom of each colorful illustration.

NONFICTION

1. What is this text about?
2. Summarize the main ideas in 5 sentences.

RL.3.7/RI.1.2

RL.3.7/RI.1.2

Dear King George

Cross-Curricular Focus: History/Social Sciences

In the late 1700s the American colonists were unhappy with King George III of England. They didn't think he was doing what a good leader should do. He charged unfair taxes, would not allow trade with other countries and made colonists open their homes for soldiers to live with them. Colonists felt very far away from their king. Something needed to change. The colonists began to rebel.

The Second Continental Congress formed in 1775 after fighting began in the American Revolution. Made up of delegates from the 13 American colonies, the Congress met in Philadelphia to lead the colonies toward independence. In 1776, a committee of the Congress selected Thomas Jefferson to write a letter to King George III. Jefferson had already proven himself to be an honorable and knowledgeable man. He was also an excellent writer.

The letter was a dangerous thing, because it would be considered treason by the king. The Congress was opposing their lawful ruler. People who were associated with this letter could be imprisoned or killed for saying they wanted to be independent from the king.

Jefferson's historic letter became known as the Declaration of Independence. It listed all the reasons that the colonists thought the king was not a very good king. It said that the king and the colonists should break their relationship with each other, and each should go their own way.

Congress approved the Declaration of Independence on July 4, 1776. All the members of the Second Continental Congress signed it at the bottom. One of the men would become famous for his signature. John Hancock, president of the Second Continental Congress, signed in large, bold letters. His name has become a synonym for signature.

Name: _____

Answer the following questions based on the reading passage. Don't forget to go back to the passage whenever necessary to find or confirm your answers.

1) Who wrote the Declaration of Independence?

2) What was the Second Continental Congress?

3) Why would sending the letter be considered treason?

4) Name one thing King George was doing that the colonists considered unfair.

5) What was John Hancock's position in the Second Continental Congress?

Convert each decimal to a fraction.

Converting from a decimal to a fraction is simple as long as you remember the place values.

ones
tenths
hundredths

0.9

The example above is nine-tenths. Let's look at how we'd write that as a fraction.

$\frac{9}{10}$

0.63

We do the same thing for the problem above. But because it is into the hundredths place we put our number over 100.

$\frac{63}{100}$

Answers

Ex. $\frac{9}{10}$

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

11. _____

12. _____

13. _____

14. _____

15. _____

16. _____

17. _____

18. _____

19. _____

20. _____

Ex) $0.8 = \frac{8}{10}$

1) $0.19 = \frac{\quad}{\quad}$

2) $0.09 = \frac{\quad}{\quad}$

3) $0.9 = \frac{\quad}{\quad}$

4) $0.4 = \frac{\quad}{\quad}$

5) $0.04 = \frac{\quad}{\quad}$

6) $0.55 = \frac{\quad}{\quad}$

7) $0.7 = \frac{\quad}{\quad}$

8) $0.1 = \frac{\quad}{\quad}$

9) $0.95 = \frac{\quad}{\quad}$

10) $0.18 = \frac{\quad}{\quad}$

11) $0.3 = \frac{\quad}{\quad}$

12) $0.77 = \frac{\quad}{\quad}$

13) $0.02 = \frac{\quad}{\quad}$

14) $0.97 = \frac{\quad}{\quad}$

15) $0.03 = \frac{\quad}{\quad}$

16) $0.46 = \frac{\quad}{\quad}$

17) $0.06 = \frac{\quad}{\quad}$

18) $0.12 = \frac{\quad}{\quad}$

19) $0.01 = \frac{\quad}{\quad}$

20) $0.94 = \frac{\quad}{\quad}$

Convert each decimal to a fraction.

Converting from a decimal to a fraction is simple as long as you remember the place values.

tens ones tenths hundredths

0.9

The example above is nine-tenths. Let's look at how we'd write that as a fraction.

$\frac{9}{10}$

0.63

We do the same thing for the problem above. But because it is into the hundredths place we put our number over 100.

$\frac{63}{100}$

Answers

Ex. $\frac{89}{100}$

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

11. _____

12. _____

13. _____

14. _____

15. _____

16. _____

17. _____

18. _____

19. _____

20. _____

Ex) $0.89 = \frac{89}{100}$

1) $0.2 = \frac{\quad}{\quad}$

2) $0.03 = \frac{\quad}{\quad}$

3) $0.4 = \frac{\quad}{\quad}$

4) $0.6 = \frac{\quad}{\quad}$

5) $0.06 = \frac{\quad}{\quad}$

6) $0.7 = \frac{\quad}{\quad}$

7) $0.21 = \frac{\quad}{\quad}$

8) $0.5 = \frac{\quad}{\quad}$

9) $0.64 = \frac{\quad}{\quad}$

10) $0.39 = \frac{\quad}{\quad}$

11) $0.98 = \frac{\quad}{\quad}$

12) $0.09 = \frac{\quad}{\quad}$

13) $0.36 = \frac{\quad}{\quad}$

14) $0.1 = \frac{\quad}{\quad}$

15) $0.3 = \frac{\quad}{\quad}$

16) $0.08 = \frac{\quad}{\quad}$

17) $0.02 = \frac{\quad}{\quad}$

18) $0.05 = \frac{\quad}{\quad}$

19) $0.60 = \frac{\quad}{\quad}$

20) $0.14 = \frac{\quad}{\quad}$

What is the quotient?

3. $41.6 \div 0.1 =$ _____

4. $7.8 \div 0.01 =$ _____

5. $30.47 \div 10 =$ _____

6. $38.2 \div 100 =$ _____

7. $4.2 \div 100 =$ _____

8. $207.83 \div 10 =$ _____

9. $26.4 \div 0.01 =$ _____

10. $4.82 \div 0.1 =$ _____

11. Arabella has \$13, all in dimes. How many dimes does she have?

12. Jorge has \$22.50, all in pennies. How many pennies does he have? Explain your thinking.

13. Henry walks to and from school each day. After 100 days of school, he has walked 125 miles. How many miles does Henry walk to and from school each day? Explain.

Find some prices of items around your home, in a store, or in an ad. Have your child find how many dimes it would take to make that amount. Then have your child determine how many pennies it would take to make that amount.
